Product Description

The V12, makes corners, circles and technical walls a breeze. The unique shape maintains a visual line no matter what the angle of the wall or whether you are doing a straight wall or a corner. The degree markers on the top of the block assist the contractor in keeping curves and lines accurate. It is the only block on the market offering these unique advantages. It is made from 70% recycled construction and demolition material and is part of the GreenLock™ range of retaining wall blocks.
